

ABSTRACT OF THE DISCLOSURE

The present invention relates to a method for producing an image-recorded medium on the surface of a transparent substrate. The image-recorded medium comprises a fixed image formed electrographically, and the fixed image is laminated on the image-recorded medium. The production method comprises the steps of forming toner layers by laminating a plurality of toner layers on the surface of the substrate electrographically, temporarily fixing the plural toner layers, and laminating the temporarily fixed image with a laminate film.
